COPD CARE MATTERS

Did You Know? Chronic Obstructive Pulmonary Disease (COPD) can worsen over time. Regular checkups help identify problems early, reduce flare-ups, and improve quality of life.

Why Regular Checkups Matter

- Monitor breathing symptoms
- Review inhalers and medications
- Reduce COPD flare-ups and hospitalizations
- Check oxygen levels and lung function
- Discuss smoking cessation resources
- Stay current on flu, COVID-19, and pneumonia vaccines

Questions to Ask Your Doctor

- Is my COPD well controlled?
- Am I using my inhaler correctly?
- Do I need lung function testing?
- What can I do to prevent flare-ups?
- Should I receive any vaccines?
- Would pulmonary rehabilitation help me?
